PROJECT EXPERIENCE

ThermoStats **Valdosta State University**
Software Development, System Architecture, and Leadership January 2022 - May 2022

- Spearheaded a team of five to develop ThermoStats, an application that logs, organizes, analyses, and predicts temperature data from any number of temperature sensors in a system.
- Designed the complex system storage database as well as the algorithm to both implement and extract data.
- Developed solo the entire beta in Java, using a JavaFX frontend.
- Developed and implemented the final product using a Python backend supported by a FastAPI framework in conjunction with a JavaScript frontend using a Vue framework.

ADDITIONAL EXPERIENCE

Self-Employed Residential Support Valdosta, GA
House Maintenance January 2024 - Ongoing

- Oversee comprehensive home maintenance, cleaning, and assistance services, applying strong organizational and time-management skills for 10+ hours a week.
- Ensure sustained client satisfaction through reliable residential support by coordinating recurring tasks, tracking schedules, and leveraging organizational strategies.
